

PROFESSIONAL EXPERIENCE

Capgemini Engineering | Software Engineer

Nov 2025 – present

- Developed frontend components for healthcare applications using Next.js (React) and Tailwind CSS, enabling clinicians to access patient data faster
- Maintained and optimized CI/CD pipelines in Azure DevOps for containerized deployments to Kubernetes, cutting deployment time and reducing build failures
- Integrated **REST APIs** with runtime validation (**Zod**), improving application reliability
- Collaborated in Agile (**SCRUM**) teams to deliver stable and production-ready features

Glantt Global | Software Developer

Mar 2025 – Nov 2025

- Supported development of React applications with Micro Frontends architecture for hospital systems, enabling faster feature deployment and easier UI maintenance
- Integrated backend services using .NET, REST, and Apollo GraphQL, streamlining data exchange and reducing integration errors
- Maintained CI/CD pipelines in Azure DevOps, automating testing and deployments, which shortened release cycles and improved deployment reliability
- Improved data access performance using **MongoDB** and **Redis** (caching strategies)
- Contributed to maintaining **90%+ test coverage** using **Jest** and **React Testing Library**

SARKKIS Robotics | Software Engineer

Jan 2024 – Feb 2025, Porto, Portugal

- Developed .NET (C#) applications using OOP and design patterns, which streamlined the codebase and reduced maintenance effort
- Contributed to system architecture using DDD principles, enabling clearer domain separation and faster feature development
- Built a 3D CAD module reducing simulation errors by **85%**, improving system accuracy
- Supported CI/CD workflows using **Azure DevOps**
- Collaborated with **international teams** across North America and Europe

N4IT | Software Engineer Internship

Feb 2023 -Jun 2023, Porto, Portugal

- Developed a React application with Tailwind CSS and Node.js that enabled engineers to provision infrastructure and manage Kubernetes clusters, reducing setup time
- Designed and integrated a C# .NET RESTful API with PostgreSQL that automated cluster provisioning, improving deployment efficiency

EDUCATION

Master in Data Engineering | Porto School of Engineering (ISEP)

Sep 2025 – present

- Focus on **Machine Learning, Data Pipelines, and Large Language Models (LLMs)**.
- Advanced coursework in **SQL and NoSQL databases** (Oracle SQL, PostgreSQL, MongoDB, Redis).

CERTIFICATION & COURSES

React Native – The Practical Guide Course (Academind/Udemy)	Aug 2025
Docker for absolute Beginners – Hands on – DevOps Course (Udemy)	Jun2025
Angular Course (ISEP)	May 2024 - Jun 2024

SKILLS

- **Languages:** C#, TypeScript, JavaScript, Java, Python, C;
- **Frontend:** React, Next.js, Angular, Tailwind CSS;
- **Backend:** .NET, Node.js, REST APIs, GraphQL;
- **Databases:** PostgreSQL, MongoDB, Oracle SQL, Redis, Neo4j;
- **DevOps & Tools:** Docker, Kubernetes, Azure CI/CD, Harbor, Jest, Zod;
- **Architecture & Practices:** Micro Frontends, OOP, Design Patterns, DDD (basic);
- **AI / Data:** Machine Learning (basic), LLMs, Prompt Engineering;
